

Abstract

The present invention relates to compounds and pharmaceutically acceptable salts of formula (I):

5 which are useful in the treatment of metabolic disorders related to insulin resistance or hyperglycemia. These compounds include inhibitors of protein tyrosine phosphatase (PTP-1B) that are useful in the treatment of diabetes and other PTP-1B mediated diseases, such as cancer, neurodegenerative diseases and the

10 like. The compounds of the invention are also useful in pharmaceutical compositions and methods of treating the aforementioned conditions.
